Viol Catalog

About us

In 1963, Keskinöglu started its activities in a small poultry farm with egg production. Today, Keskinöglu produces chicken meat, practical products, table and pasteurised eggs and viols in its facilities in Manisa Akhisar.

In 2023, our company strengthened its power by joining the Matlı Şirketler Grubu (Group of Companies) and maintains its existence as a part of a large group in other links of the protein chain.

In line with the fully integrated production strategy, we produce in accordance with international norms using high hygiene standards in our broiler meat, practical products, table and pasteurised egg facilities, as well as in our breeder incubation, pullets, and tray facilities, and we develop new products in the R&D Centre we have established within our structure. Through 3 regional directorates, widespread distributorship and export channels, we bring our products to consumers all over the world.

In an era where the world and technology are changing rapidly and success is defined as 'sustainable success', as a subsidiary of Matlı Şirketler Grubu (Group of Companies), we attach great importance to the concept of 'Sustainability' because of our philosophy: 'We care about future generations'. We care about issues such as preventing food waste, efficient use of resources, protecting the environment, recycling wastewater, water and energy efficiency, and in this direction, we continue to make sustainability investments in all production models in order to use our resources much more accurately.

We continue our activities with the awareness of trust, honesty, service to society and social responsibility by strengthening the ties we have established with our employees, business partners, suppliers, all our stakeholders and consumers day by day.

**400 million units per year
Production Capacity**

WE CARE ABOUT FUTURE GENERATIONS!

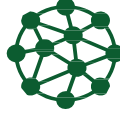

We produce essential food products to nurture healthy generations while protecting our natural resources.

We focus on social responsibility projects that support children, youth, and women.

We implement our waste management and green energy investments in line with the "Zero Waste" principle.

We invest in innovative products, advanced technology—in short, we invest in the future.

We recognize the value of a sustainable world and act with responsibility accordingly.

**Because... We know the future is entrusted to us.
We care about future generations!**
