About us

Keskinoglu, which began its egg production operations with a small chicken farm in 1963, now exports its chicken meat, table eggs, pasteurized eggs, viols, and processed products to various parts of the world from its facilities in Manisa Akhisar. Keskinoglu, the first fully integrated poultry producer in Türkiye, connects its products with consumers through its three regional directorates and an extensive dealer network.

In 2023, Matlı Companies Group acquired Keskinoglu and thus Keskinoglu has strengthened its position because of that Matlı Group, which is the largest feed producer, the largest egg producer, and one of the top five milk producers in Türkiye. And continues its operations in 7 regions of the country with 29 companies, 29 brands, 2 R&D Centers, over 10,000 suppliers, and more than 7,000 employees in 81 provinces and nearly 1,000 dealerships.

Matlı ensures the quality of its products directly from the source through its golden supply chain. Keskinoglu meticulously manages the entire process of its products from the ground to the table. It acquires high-quality raw materials through licensed warehousing activities. By feeding chickens with its own produced plant-based feeds, Keskinoglu transforms this into highly nutritious chicken meat and eggs within its organization, bringing out the delicious flavors.

Since 2006, Matlı has also been conducting research and educational activities in the fields of animal care, nutrition, and health. In 2023, it established a Research and Development Center within Keskinoglu to develop new products. Keskinoglu holds the BRC Quality and Food Safety Management System Certificate and operates with the most state-of-the-art technology in control and tracking systems from the initial stage to the final stage of production. It follows international standards by implementing high hygiene standards in its breeding, pullet, and hatchery facilities. Following its fully integrated strategy, it offers eggs in viols with its own produced egg cartoons. It continues to expand its product range every day to provide quality service to its customers. Keskinoglu's flavors, tailored to the Turkish palate, are presented in accordance with quality and halal slaughter standards. Therefore, it guides its activities with the goal of being the first brand that comes to mind when it comes to "Flavor" and "Trust." It has been a guest at tables for years, accompanying lives with chicken and eggs that are enjoyed in every meal.
